Skills

iOS & Swift Development

- Swift (Async/Await, Swift Concurrency)
- SwiftUI (iOS 17, @Observable, ViewModifiers, Animations)
- MVVM Architecture
- Firestore & Firebase Authentication
- UserDefaults
- REST API Integration (URLSession, Codable)
- Dependency Injection (DI)
- MapKit, UserNotifications, AVFoundation
- Unit Testing (XCTest)
- English C1

Tools & Collaboration

- Git (branching, conflict resolution, PR reviews)
- Figma (UI handoff & prototyping)
- Xcode Instruments, Console

AppStore Apps

- [CoffeeDrop](#)
- [I'm Poor](#)
- [Don't do it - list](#)
- [Sleep Don't Weep](#)

Interests

- Running, cycling, making music

Work Experience

CoffeeDrop.app (2024 – now)

A fully launched iOS application that helps users discover over 300 specialty coffee shops across Poland. The app offers an interactive map, filters (e.g. favorites, open now), user accounts, and personalization features. Content is synchronized with a custom WordPress CMS via Firebase.

Technologies: SwiftUI, MVVM, Firebase (Firestore, Authentication, Messaging), MapKit, REST API, Combine, Git

„I'm Poor” (2024)

A humorous iOS app that delivers daily “poor” messages. Users can contribute their own texts.

Technologies: SwiftUI, MVVM, Async/Await, Combine, UserNotifications

“Sleep Don't Weep” (2023)

App for playing white noise to help children fall asleep. Includes a timer and plans for Apple Watch integration.

Technologies: SwiftUI, MVVM, AVFoundation

“Not To Do List” (2023)

A minimal app for tracking things users want to avoid doing.

Technologies: SwiftUI, MVVM, Core Data

KopiujWklej – Freelancer / Business Owner (2016–2025)

- Designing websites in Figma and WordPress
- Building WooCommerce stores (bilingual) and corporate websites
- Creating multimedia presentations for business clients
